

AI-POWERED MARKET PREDICTIONS

SAIA

STOCK AND ARROWS INVESTING APP

SAIA tracks live prices across global and regional markets, runs them through AI-driven predictions, and shows one clear signal — up or down — before you decide.

THE CORE IDEA

EVERY STOCK POINTS SOMEWHERE

Markets move fast and headlines pull in every direction. Investors are left guessing whether to buy, hold, or sell. SAIA turns that noise into a single, obvious signal — so you always know which way a stock is headed before you act.

UP

The model projects gains — a green arrow points the way.

DOWN

The model projects a pullback — a red arrow flags the risk.

WHAT IS SAIA?

SAIA stands for Stock And Arrows Investing App. It's built around one simple idea: every stock is either pointed up or pointed down. SAIA's job is to make that direction obvious — backed by real data and AI analysis — before you put your money behind it.

01

Live Market Data

Prices, volume, and history pulled continuously from major exchanges — NASDAQ, TADAWUL, EGX, DFM and more.

02

AI-Powered Predictions

A prediction model projects where each stock is likely headed over the next day.

03

One Clear Signal

No jargon, no clutter. Just a green or red arrow, so you know the direction at a glance.

04

Ask SAIA

Talk to SAIA directly — ask about any stock, compare two tickers, or get a plain-English read on the market.

FROM DATA TO DECISION

Three steps between you and a clear read on any stock — no spreadsheets, no guesswork.

STEP 01

1

Live data streams in

Prices, volumes, and headlines are pulled continuously from global and regional exchanges the moment they update.

STEP 02

2

The AI model reasons about it

A prediction model and a sentiment model process that data to project where each stock is likely headed next.

STEP 03

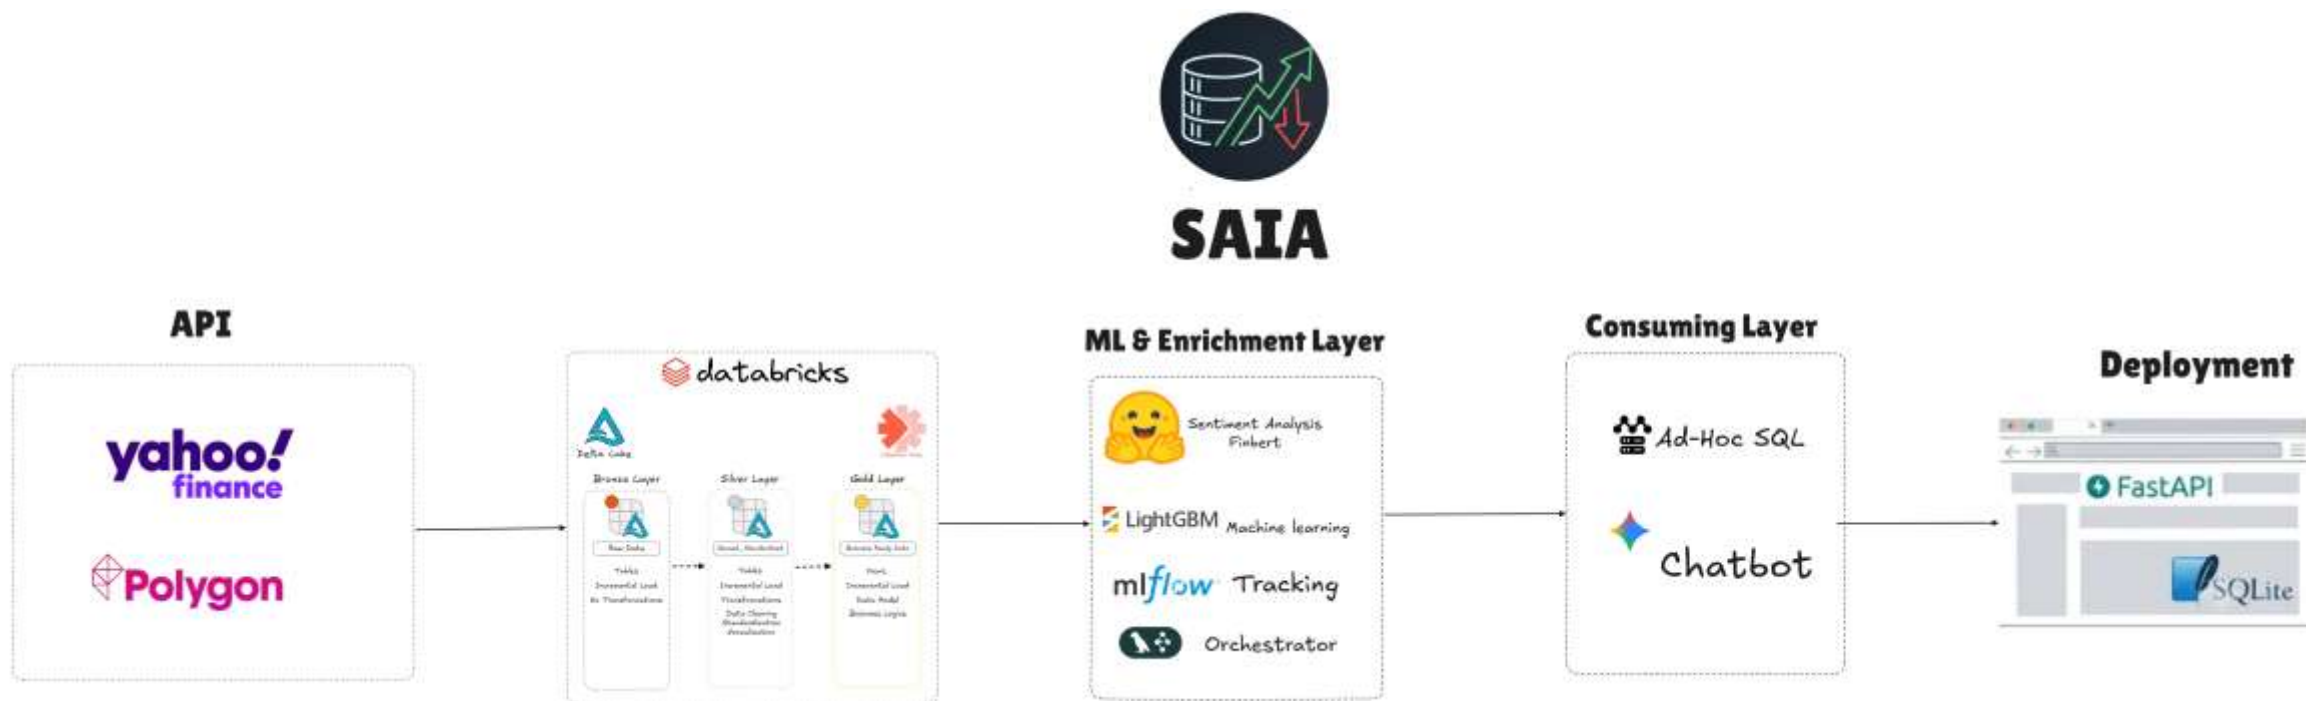

3

You get one clear signal

A single green or red arrow on every ticker, so you always know the direction before you decide.

SYSTEM ARCHITECTURE

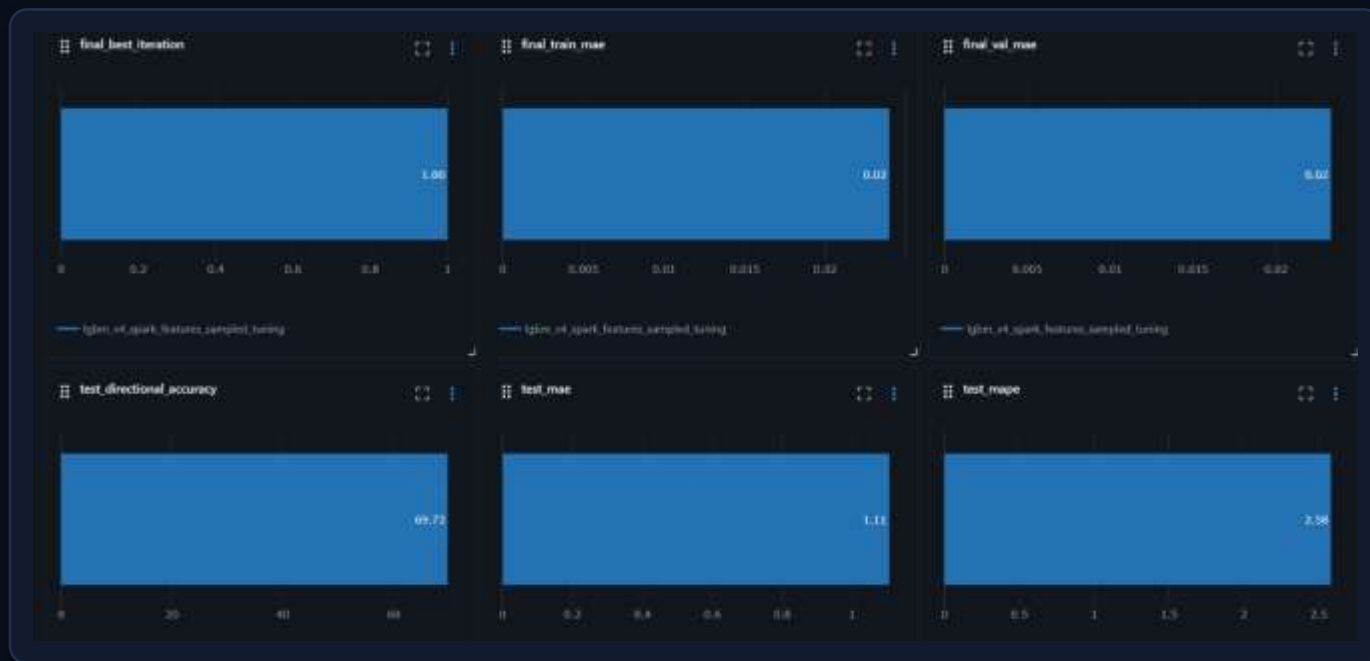

From raw market APIs to a live AI-powered signal — the full data pipeline behind SAIA.

Yahoo Finance & Polygon APIs → Databricks Bronze / Silver / Gold → LightGBM + FinBERT + MLflow → Chatbot & Ad-Hoc SQL → FastAPI + SQLite

MODEL PERFORMANCE

Tracked and versioned end-to-end with MLflow — LightGBM regression model (lgbm_v4_spark_features_sampled_tuning).

DEEP-DIVE STOCK PROFILES

Every ticker gets a full profile: live price, valuation ratios, 52-week range, volume, sector detail, and an interactive 30-day price chart — all in one view.

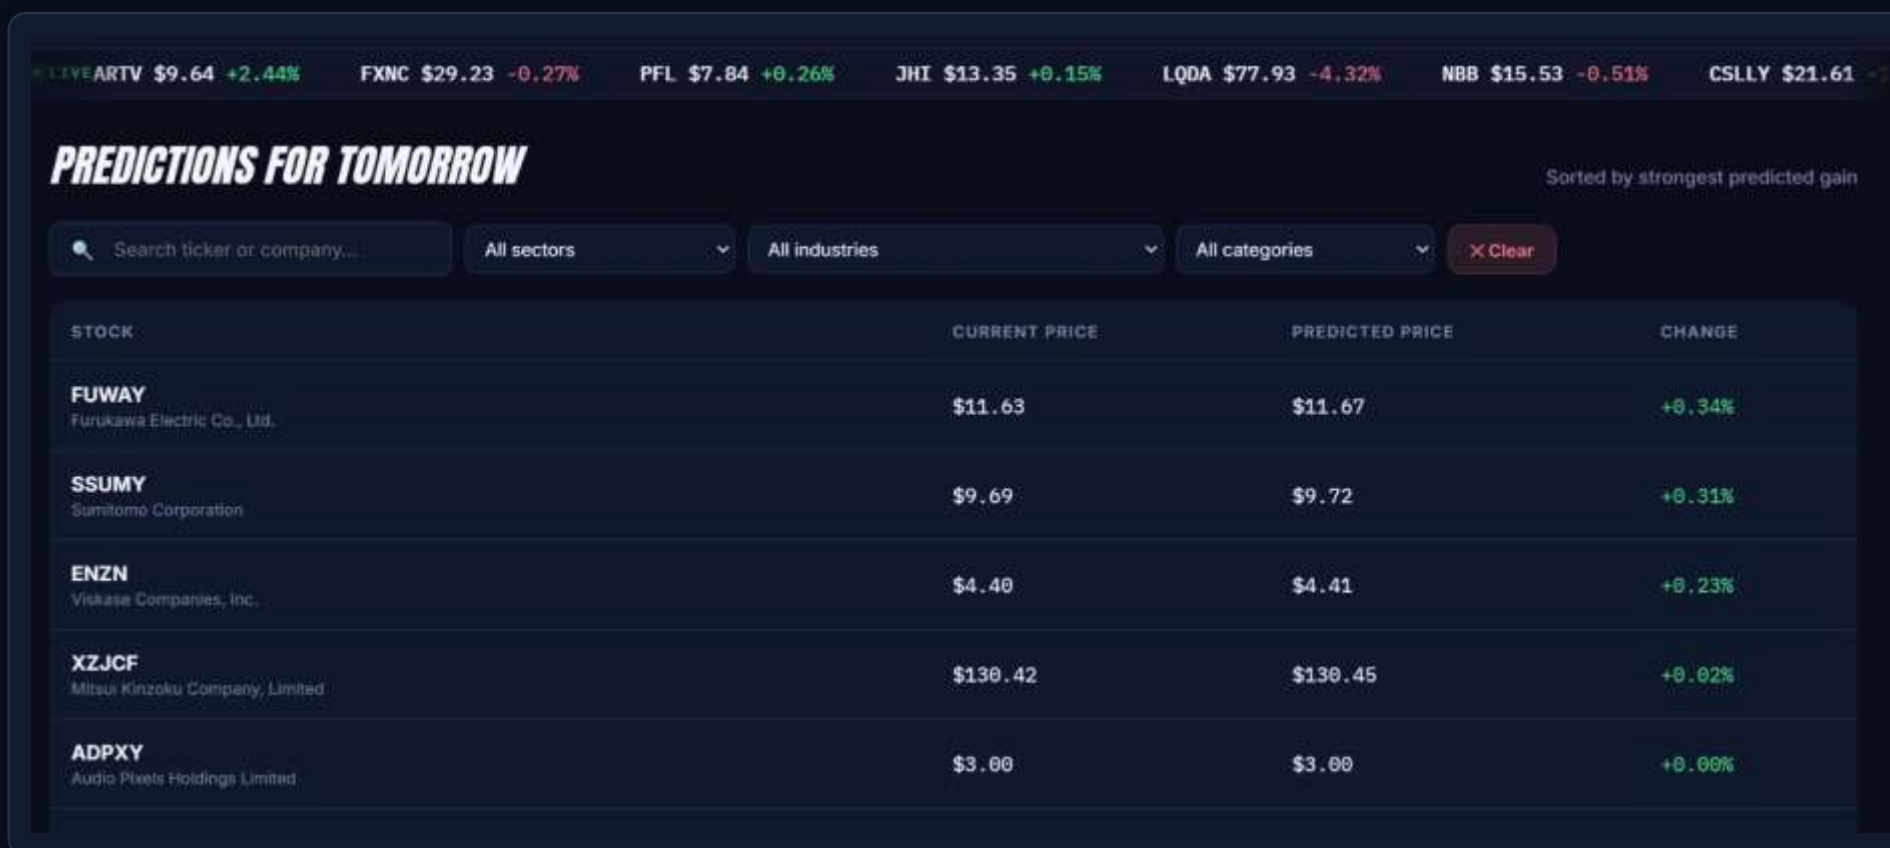

ALL STOCKS, ONE SCREEN

Browse all 13,599+ tracked stocks with instant filters for sector, industry, and category — gainers, losers, and 52-week movers at a glance.

PREDICTIONS FOR TOMORROW

Every stock gets a next-day predicted price from the model, sorted by strongest predicted gain, alongside its current price and percent change.

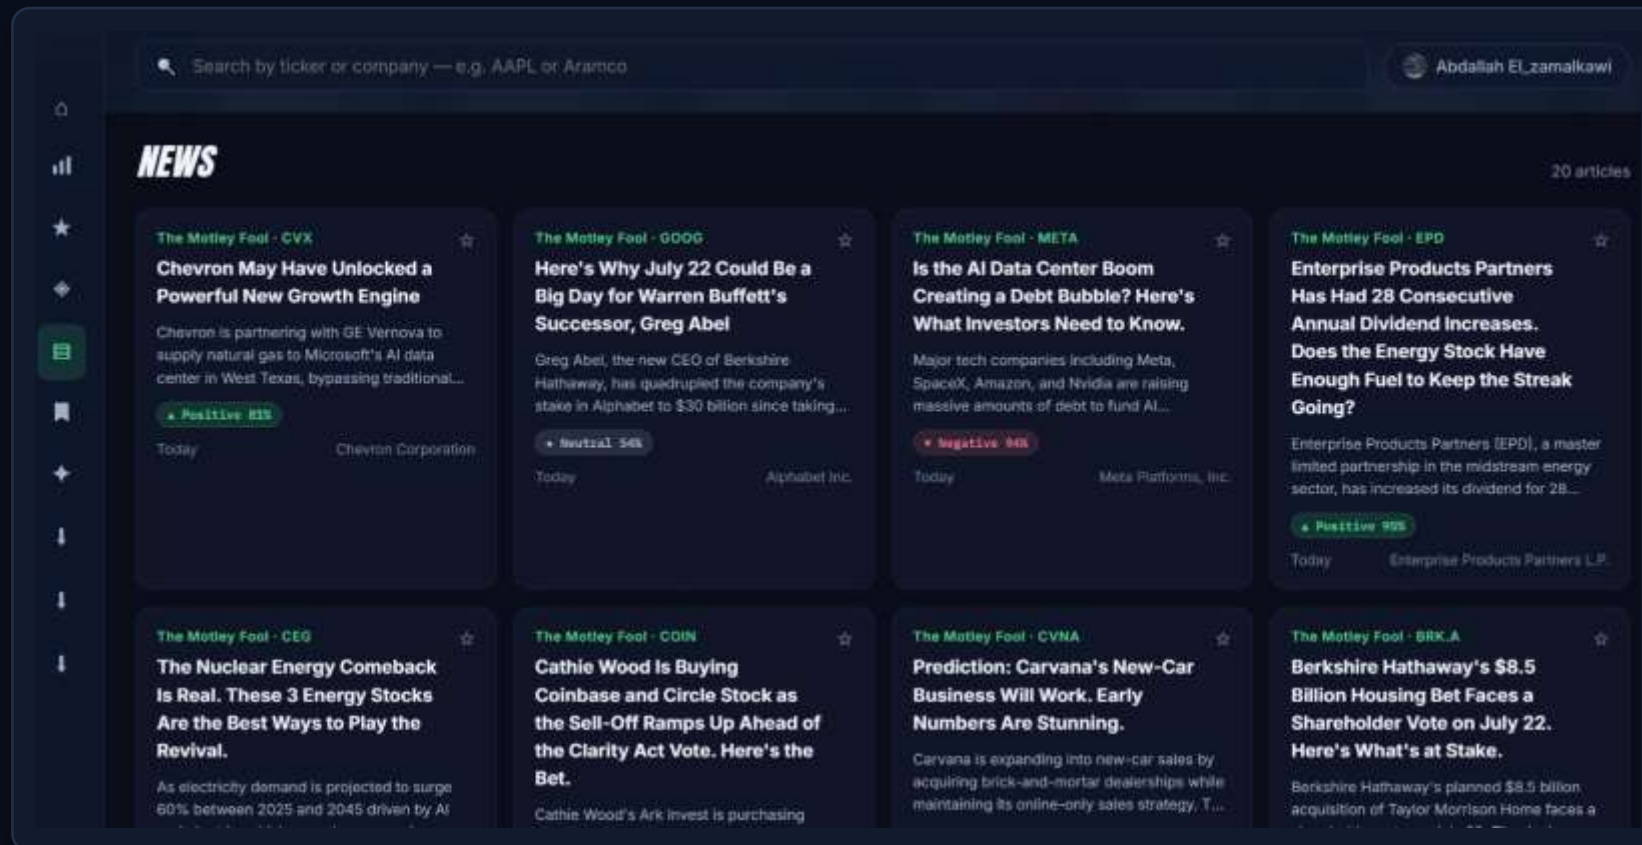

Predictions for Tomorrow Sorted by strongest predicted gain

Search ticker or company... All sectors All industries All categories X Clear

STOCK	CURRENT PRICE	PREDICTED PRICE	CHANGE
FUWAY Furukawa Electric Co., Ltd.	\$11.63	\$11.67	+0.34%
SSUMY Sumitomo Corporation	\$9.69	\$9.72	+0.31%
ENZN Viskase Companies, Inc.	\$4.40	\$4.41	+0.23%
XZJCF Mitsui Kinzoku Company, Limited	\$130.42	\$130.45	+0.02%
ADPXY Audio Pixels Holdings Limited	\$3.00	\$3.00	+0.00%

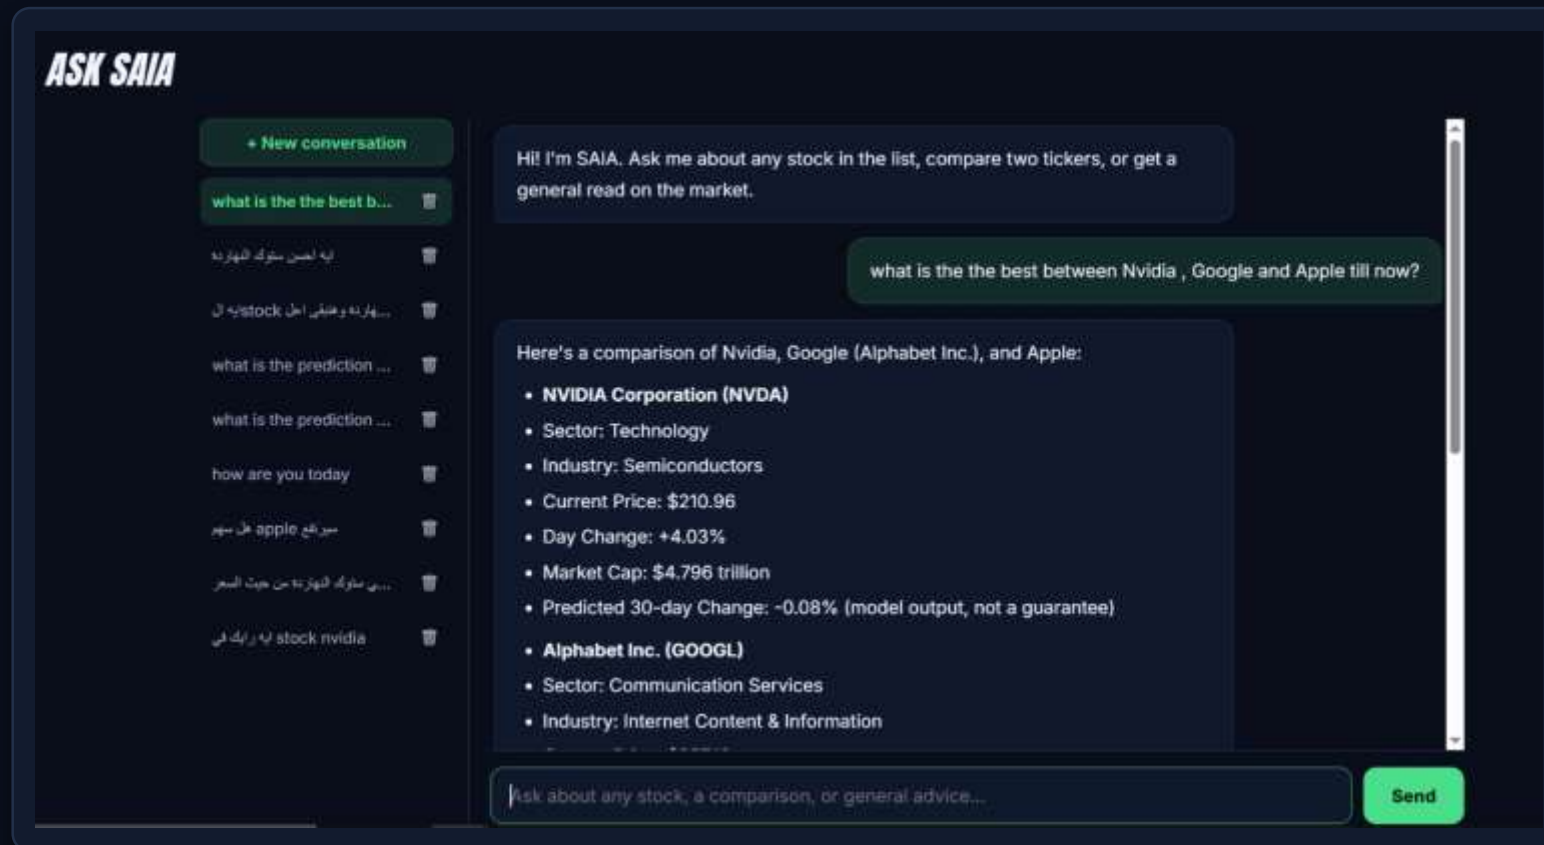

NEWS, SCORED FOR SENTIMENT

Curated market news is scored positive, neutral, or negative — so you can read the headline and the market's likely reaction in one glance.

ASK SAIA: YOUR AI ANALYST

A built-in AI assistant answers questions about any stock, compares tickers side by side, and keeps a running history of every conversation.

PRICE HISTORY, AT A GLANCE

Every stock includes an interactive 30-day chart with hoverable daily data — open, high, low, close, and volume — so you can verify the trend behind every signal.

BUILT ON REAL DATA, EXPLAINED SIMPLY

How does the prediction model work?

SAIA runs each stock's recent price history through an AI prediction model that projects a likely price for the next day out.

Is the market data real or simulated?

Real-time and historical data sourced directly from global exchanges via the Polygon API — not a simulation.

Which markets are covered?

Stocks from NASDAQ, TADAWUL, EGX, and DFM, spanning tech, energy, banking, and more sectors.

How does the AI assistant help?

Chat about any stock, compare two tickers, or get a plain-English read — always reminding you it's simulated, not financial advice.

Demo platform — predictions are for illustrative purposes only and do not constitute financial advice.
